## ABSTRACT:

PURPOSE: To obtain a cosmetic having high safety and stain-removing effect and giving good feeling to the skin by compounding a scrubbing agent comprising crushed mushroom such as Tremella fuciformis or Auricularia auricula-judae or extraction residue of the above mushroom extracted with water, lower alcohol, etc.

CONSTITUTION: Mushroom belonging to order Tremella or Auricularia is crushed in raw or dried state to an average particle diameter of 0.05-0.5mm or extracted with water, a lower alcohol or their mixture. The crushed mushroom or the extraction residue is compounded as a scrubbing agent in an amount of 0.001-5wt.% to obtain the objective cosmetic. The scrubbing agent is effective in improving the stain-removing effect since the agent peels off the stain taking advantage of the hardness and adsorbs the stain. It can be used in the form of cleansing cream, massage cream, cold cream, cream pack, face wash, etc.
